## Customer Reviews

These are not flashcards; they are semi-heavy paper with some content on one side and the rest on the other. They are also too large for easy handling. The content seems okay but to call something a flashcard should meet at least this minimum criteria: 1) be printed on card stock, 2) have a question or topic on one side and the answer or details on the other, 3) be of suitable size for flipping over.

These "flashcards" are a lot bigger than I thought, but they were helpful. I liked that the images of the position and of the xray were on the cards.

They have a lot of information on them. They are big but more of a picture paper

I really like this product. I found it helpful for studying for my registry!

Very helpful for finals
