Everything: The Black And White Monograph

Synopsis

Internationally renowned photographer Christopher Makos compiles here the finest of his black and white photography. With startling innovation and an eye for the cutting edge, Makos has made an extraordinary contribution to modern photography, continuously pushing the boundaries of his medium. *Everything: The Black and White Monograph* celebrates the work and influence of the man Andy Warhol called "the most modern photographer in America." *Everything* is a comprehensive survey of Makos's photographic work from 1973 to the present. As Peter Wise writes, it is a collection of images "so distinctly of a particular moment that a whole context is encapsulated" that communicate "something singular about a cultural moment." This compilation, the first volume in a projected series, is unbound by "categories, themes, or specific subject matter." Instead, it serves as a period piece, a vision of a particular time and place assembled by the man Doston Rader says is "widely considered the most important and gifted photographer of his generation." Contents: Artworks; Photo Index; Introduction; Notes on *Everything*; Biography; Bibliography; Author Chronology; Makostudio.

Customer Reviews

This is not so much review, but in a world, where everything is either on an iPad, your phone, or an e-reader, my current monograph allows us all, including myself a view into the world of black and white, that somehow we forgot even existed. Not just a trip down memory lane, but a trip that might re-awaken the senses

Beautiful photography, beautiful book! A must have if you are a Makos fan and collector. Great holiday gift too!
