Truly Constantine Manos is one of the best practitioners of color photography around. His photos are familiar and yet slightly surreal, leaving you with more questions than they answer. Costa's mastery of color, shadow and shape will have you looking at these strange and wonderful photos again and again. I probably own about 200 photo books. This is without a doubt one of the best.

This is the book that for me, changed my view of street photography. The photos in this book utilize color, shadows, and people in a way that is unique. They are beautifully composed and really show the skill of someone who has been photographing for over 60 years. This is a big book that is packed with photos so it will keep you busy for a while and if you're a photographer like me, can be a great source of inspiration. I own quite a few photography books, and this one stands out as one of my favorites.

very good quality book.great color and fantastic pics.this book is a mast have for every one that

likes pics.is one more school for the eye.

I bought the book because I liked the cover and believed the previous review to be accurate. What a mistake! This book looks like the work of a beginner at street photography, not an established professional; many of his shots seem to be taken from the hip resulting in poor framing, lots of peoples' backsides, irrelevant and repetitive. The composition is tedious, mechanical, uninspired. The author tries to be edgy but it after a few images you get tired of the same gimmick of underexposure in fore-plan, shadows on the wall and framing some silly subject. I uploaded some images and wrote notes so that others can decide for themselves. Boring, boring, boring. I am disappointed and will return it.
