# Barr's The Human Nervous System: An Anatomical Viewpoint

## Synopsis

For over thirty years The Human Nervous System has offered a concise, well-written text on neuroanatomy for both medical and allied health students. This successful title is organized into four major parts: cellular aspects of the nervous system, regional anatomy of the brain and spinal cord, sensory and motor systems, and blood supply. The Eighth Edition has been simplified to enhance coverage of the essentials and help students learn important facts and definitions. A FREE CD-ROM packaged with the book contains more than 400 interactive self-testing multiple-choice review questions, as well as expanded versions of selected chapters.

## Book Information

Paperback: 304 pages

Publisher: LWW; Eighth edition (December 1, 2004)

Language: English

ISBN-10: 0781751543

ISBN-13: 978-0781751544

Product Dimensions: 9.9 x 7.1 x 0.7 inches

Shipping Weight: 1.8 pounds

Average Customer Review: 3.8 out of 5 stars [See all reviews](#) (6 customer reviews)

Best Sellers Rank: #1,244,498 in Books (See Top 100 in Books) #88 in [Books > Textbooks >](#)

## Customer Reviews

This was a required textbook for my Neuroscience courses in chiropractic school, and it suited me very well (I'd say even better than the other required textbook). Now, in undergrad I was never one to really use the textbook (the professors only ever ask questions based on things they actually say, right?), but in this case I had an amazing professor and the book was helpful in making me understand the information even better.

This text was assigned by my Neuro prof for Neuroanatomy in medical school. It is dense, hard to read through, and is not an enjoyable read by any stretch. Use this book as a reference, but for a much better read, go for Lange neuro board review book.

very dense and hard to read text. If you are a beginner in neuroanatomy this would not be a good book for you. It is more of a review instead of a primary source for learning neuroanatomy
